## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "5" is not in the spec. and "241" is referred to as "2411" on page 6, lines 19 and 24 of the spec. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Huang (US 5,806,877 A).

Huang discloses a stroller comprising a leg unit 11, a seat frame 12 pivotally mounted to said leg unit, a backrest frame 21 pivotally mounted about a first axis to said seat frame and extending upward and rearward relative to said first axis, a positioning mechanism 30 comprising an elongate base 33 pivoted to said leg unit by a pivot pin (not numbered) defining second pivot axis parallel to said first axis, an elongate rail unit 32 between said base and backrest including a slide unit 321 with sliding face for receiving said base, first and second engaging units 333,36 respectively, a pushing unit 31 connected to said sliding unit for engaging and disengaging the first and second engaging units to allow the backrest to rotate between positions relative to said seat frame, and a control unit 25 with string 26 for actuating the pushing unit and slide unit, as shown in figures 1-8.

#### ***Allowable Subject Matter***

4. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

#### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Capron, Smith, Emmerich et al., Nakao et al., Liu, Kato et al., Cabagnero, Perego, Chen et al., and Cheng all disclose stroller backrests of interest.
